## Rutgers University/Johnson & Johnson Health Economics & Outcomes Research Fellowship

# FELLOWSHIP OVERVIEW

# MESSAGE TO CANDIDATES

# JOHNSON & JOHNSON CREDO

## Ernest Mario School of Pharmacy, Rutgers University

Ernest Mario School of Pharmacy, Rutgers University is part of Rutgers Biomedical Health Sciences (RBHS) and participates in interdisciplinary professional education and training partnerships with Rutgers School of Public Health and the Robert Wood Johnson Medical School.

This Fellowship program, in partnership with Janssen Scientific Affairs, LLC, a Johnson & Johnson Company, Health Economics & Outcomes Research (HECOR) group, offers a significant opportunity to individuals interested in health economics, cost and services utilization analysis, and patient reported outcomes research. Composed of practical research experience, didactic courses, and seminars, the program provides training in the application of HECOR in an industry setting, including designing and conducting outcomes research studies that examine economic, clinical, and humanistic outcomes.

Upon being selected for the program, the Fellow will be employed for one year by Rutgers University; however, the Fellow will work onsite with researchers at Janssen Scientific Affairs, LLC HECOR offices located in Raritan, New Jersey.

Fellowship training activities may include:

- Contributing to trial design planning to incorporate patient reported outcomes (PROs) and health economic measures through conducting evidence-based literature reviews and PRO questionnaire evaluation
- Conducting burden of illness evaluations to better characterize patient and population unmet needs through database analysis and literature reviews
- Developing health economic models to characterize and communicate the budget impact and cost-effectiveness of new or existing therapeutics
- Conducting comparative effectiveness research using Real World Data
- Participating in cross-functional teams in an effort to gain a better understanding of how HECOR can be used in the decision-making process associated with the development and commercialization of new pharmaceutical products

The Fellow will also have the opportunity to learn about the application of health economics and outcomes research in an academic setting at the Ernest Mario School of Pharmacy and the Rutgers School of Public Health. Didactic training includes tuition reimbursement for up to 3 three-credit graduate courses. Course selection will be determined by the Fellow in consultation with the Fellowship's primary preceptors.

Dear Prospective Fellow,

At Janssen, we collaborate with the world to develop transformational medicines. What matters most to us is improving health – patients are our first responsibility and the inspiration for our work every day. We are committed to providing safe and effective medicines as well as services and support across five therapeutic areas, including:

- Cardiovascular and Metabolism
- Immunology
- Infectious Diseases and Vaccines
- Neuroscience and Oncology

Our more than 40,000 employees in 150 countries work within and beyond our communities to bring innovative treatments for serious unmet medical needs.

Our company, which was recently cited as “the fastest growing top 10 pharmaceutical company in the U.S., Europe and Japan,” anticipates more than 10 new product filings and 25 line extensions by 2017. This rich environment of medical progress and opportunity has been born from the passion and integrity of our people. Bringing transformational solutions to patients lends a special urgency to our work.

We are proud of our organization, and appreciate that you will consider Janssen North America Pharmaceuticals in your fellowship search. You will be sure to find a rich, rewarding environment that will provide you with critical industry experience and a strong career foundation -- along with a heightened understanding of what matters most – improving health around the world.

Thank you for your interest.

Sincerely,  
Jennifer Taubert  
Company Group Chairman  
North America Pharmaceuticals  
Johnson & Johnson

We Believe our first responsibility is to the doctors, “nurse and patients, to mothers and fathers, and all others..” who use our products and services. In meeting their needs everything we do must be of high quality. We must constantly strive to reduce our costs in order to maintain reasonable prices. Customers’ orders must be serviced promptly and accurately. Our supplier and distributors must have an opportunity to make a fair profit.

We are responsible to our employees, the men and women who work with us throughout the world. Everyone must be considered as an individual. We must respect their dignity and recognize their merit. They must have a sense of security in their jobs. Compensation must be fair and adequate, and working conditions clean, orderly and safe. We must be mindful of ways to help our employees fulfill their family responsibilities. Employees must feel free to make suggestions and complaints. There must be equal opportunity for employment, development and advancement for those qualified. We must provide competent management, and their actions must be just and ethical.

We are responsible to the communities in which we live and work and to the world community as well. We must be good citizens - support good works and charities and bear our fair share of taxes. We must encourage civic improvements and better health and education. We must maintain in good order the property we are privileged to use, protecting the environment and natural resources.

Our final responsibility is to our stockholders. Business must make a sound profit. We must experiment with new ideas. Research must be carried on, innovative programs developed and mistakes paid for. New equipment must be purchased, new facilities provided and new products launched. Reserves must be created to provide for adverse times. When we operate according to these principles, the stockholders should realize a fair return.
